ARAN BARZANJI

ABOUT

Full stack developer with DevOps responsibilities exhibiting excellent communication, critical thinking, and positive "can do" attitude. In my current role I am involved throughout the entire process of developing an application – from building/collecting requirements with the customer, to programming the application, to deployment and maintenance.

EXPERIENCE

SOFTWARE DEVELOPMENT ANALYST 2
Huntington Ingalls Industries, Newport News, VA
Sep 2019 - Present

- Responsible for developing and maintaining multiple .NET applications. Team lead, head developer on C# application. Involved from the initial launch stages, including customer meetings, to after production launch support and continual development efforts.
- Helping to incorporate best practices by incorporating more DevOps principles into our development environments and encouraging the use of cloud services such as Microsoft Azure and its features.
- Conducting merge requests/code reviews as team lead and setting up branch policies to develop merging processes/standards and facilitate auto-merging and CI/CD.
- Participation in daily stand-up meetings to coordinate development efforts with the team in Agile fashion plus consistent communication with customers to elicit requirements and conduct maintenance.
- Development of Windows Batch scripts, and PowerShell scripts to automate repetitive tasks, saving hundreds of man-hours per year.

PROJECTS & OTHER EXPERIENCE

- Experienced in .NET development, C#, relational databases/SQL, Elasticsearch, Kibana, PHP, JSON, HTML, CSS, Web Scraping, Bash Scripts, Docker, JS, LAMP/WAMP stacks, CI/CD using Gitlab (YAML), automated unit tests, Git.
- Recent project – Fake News Analyzer web app. This includes a search engine which allows users to search for fake news articles that are indexed using Kibana/Elasticsearch. It is able to display matching fake news articles on one side of the split panel, and up to 10 corresponding scientific research papers that may refute the fake news article on the other side. Other features: User accounts, RESTful API, 2 factor auth, XSS prevention. Fake News Analyzer by Aran Barzanji.
